

ATRIA

SKÖLLERSTA, SWEDEN

SUSTAINABLE MEAT PROCESSING

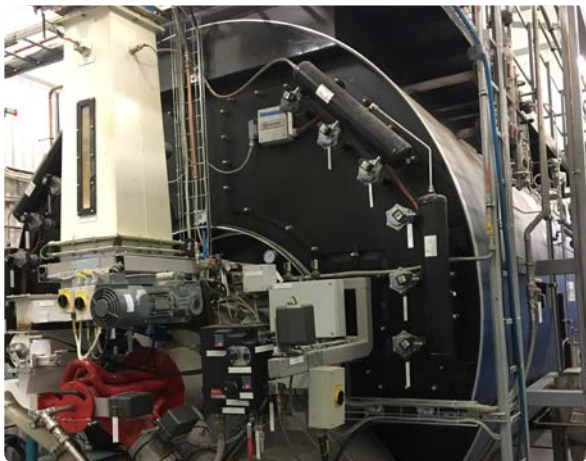

ATRIA SWEDEN AB, a **meat and food processing** plant, located in the Swedish town Sköllersta, is part of the leading (1.44 billion turn over) Finnish group ATRIA plc.

We've **exchanged** their actual fuel oil fired **steam boiler** with a woodpowder fired steamboiler. We've supplied a **pre-fabricated boiler house** in which we house the fuel (wood pellet) preparation, woodpowder dosing system and the new steam boiler. The flue gases are treated by a ESP, which is located outside.

The PetroBio woodpowder fired steam boiler is the perfect choice for ATRIA looking at their **variable steam demand** profile and their **frequent start and stops**.

ATRIA

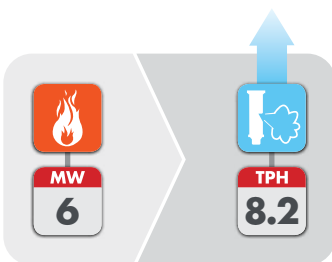

Good food – better mood.

ATRIA

Commissioned	June 2016
Fuel	wood pellets, LFO
Nominal LHV	17,000 kJ/kg
NO _x emissions	180 mg/Nm ³
Dust emissions	30 mg/Nm ³

QUALITY SINCE 1964
