

AirPac - Electric Air Heater

Windsor has been supplying air heaters for hygienic industrial applications for over 30 years. Due to demand, we have expanded our range to include a modular electric air heater that can be adapted to suit new or existing plant. Enjoy the on/off, low maintenance experience of electric heat plant.

Key Features

- 3-phase electric elements
- SCR-thyristor controlled
- Bespoke modular design for brownfield integration
- SS316L hygienic construction
- 400 or 690V options (others can be considered)
- Individual element protection and fault detection
- Safeguard process airflow monitoring
- Removable element banks for maintenance
- Air filtration and process air fan package available
- Stainless steel ducting
- Fabricated in Wellington, New Zealand
- Control cabinet – CompactLogix PLC
- Installation, commissioning, and training
